

Mrs. E.M. Zhuravleva  
Director General  
Clean Technologies LLC

27.06.2016 No. 29-01/964

**Review  
on the use of *O-BISM* technological equipment complexes and detergents "**

Car repair depot JSC Valga Depot has been operating since 2015 equipment for cleaning internal surfaces of railway tanks boilers from petroleum products, including stable gas condensate, with capacity 12 units per day, designed, manufactured and supplied by Clean technologies company («*CTG*»).

The implemented technology is based on modern exclusive equipment operated in closed mode and self-cleaning technical detergents *O-BISM*. Detergents, which are key to implementation of the idea of recirculation closed cycle technology, are characterized by highly efficient cleaning at relatively low temperatures (45-55° C) and reusability by bring detergent to the desired concentration.

The use of technology, equipment and detergents «*CTG*» allows processing of rail tank boilers with:

- low cost of fuel and energy and material resources;
- high quality preparation of rail tank cars for repair;
- no discharges of pollutants into environment.

Currently, the equipment complex is operated in standard operating mode and efficiently solves the challenges facing JSC Valga Depot.

Best regards,

Korotych Yu. S.  
Deputy Director

A handwritten signature in blue ink is written over a circular official seal. The seal contains the text "DEPOO OF VALGA DEPOO" at the top, "EESTI" at the bottom, and "VABARIK" in the center. The seal also features a stylized train icon and the Estonian text "VALGA DEPOO" at the bottom.

Signed and sealed.  
Seal: Valga Depot Ltd.
